PDF Viewer

A sample document for exercising the viewer

Welcome! This document was generated with a small Python script so that the viewer has something to show the moment it opens. Try selecting this text, searching for a word such as **aurora** or **lighthouse**, zooming, rotating, and jumping between pages with the thumbnails on the left.

- Open your own file with the folder button or by dropping it onto the window.
- Use the arrow keys, Page Up / Page Down, Home and End to move around.
- Press Ctrl/Cmd + F to search, Ctrl/Cmd + plus or minus to zoom.

1. Navigating long documents

Paragraph 1. A lighthouse keeper once kept a notebook of every ship that passed in the night, writing down the colour of its lamps and the direction of the wind. Over the years the notebook grew into a quiet record of the sea, and anyone reading it could follow the seasons simply by the names of the vessels. The viewer renders each page lazily, so even a very long notebook stays responsive.

Paragraph 2. A lighthouse keeper once kept a notebook of every ship that passed in the night, writing down the colour of its lamps and the direction of the wind. Over the years the notebook grew into a quiet record of the sea, and anyone reading it could follow the seasons simply by the names of the vessels. The viewer renders each page lazily, so even a very long notebook stays responsive.

Paragraph 3. A lighthouse keeper once kept a notebook of every ship that passed in the night, writing down the colour of its lamps and the direction of the wind. Over the years the notebook grew into a quiet record of the sea, and anyone reading it could follow the seasons simply by the names of the vessels. The viewer renders each page lazily, so even a very long notebook stays responsive.

Paragraph 4. A lighthouse keeper once kept a notebook of every ship that passed in the night, writing down the colour of its lamps and the direction of the wind. Over the years the notebook grew into a quiet record of the sea, and anyone reading it could follow the seasons simply by the names of the vessels. The viewer renders each page lazily, so even a very long notebook stays responsive.

Paragraph 5. A lighthouse keeper once kept a notebook of every ship that passed in the night, writing down the colour of its lamps and the direction of the wind. Over the years the notebook grew into a quiet record of the sea, and anyone reading it could follow the seasons simply by the names of the vessels. The viewer renders each page lazily, so even a very long notebook stays responsive.

Paragraph 6. A lighthouse keeper once kept a notebook of every ship that passed in the night, writing down the colour of its lamps and the direction of the wind. Over the years the notebook grew into a quiet record of the sea, and anyone reading it could follow the seasons simply by the names of the vessels. 2. Tables and data

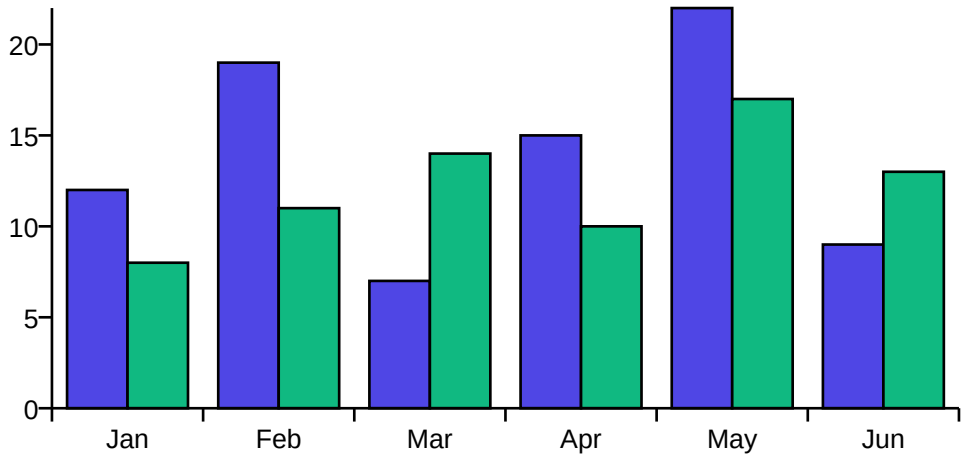
Tables are drawn as vector graphics with real text, so the numbers below are selectable and searchable.

Region	Q1	Q2	Q3	Q4	Total
North	120	135	150	170	575
South	98	110	125	140	473
East	143	150	149	160	602
West	87	95	120	133	435
Aurora Station	12	18	25	31	86

Monthly totals



3. A landscape page

This page is landscape to show that the viewer handles mixed page sizes. The aurora is visible from the northern station on clear winter nights, and the observers there log every sighting with the time and its colour.

Night	Start	End	Colour	Intensity	Notes
#1	21:07	01:13	violet	2	light cloud
#2	22:14	02:26	red	3	very bright aurora
#3	23:21	00:39	green	4	short burst
#4	20:28	01:52	green	5	calm sky
#5	21:35	02:05	violet	1	light cloud
#6	22:42	00:18	red	2	very bright aurora
#7	23:49	01:31	green	3	short burst
#8	20:56	02:44	green	4	calm sky

4. The end

That's it. Thanks for trying the viewer! Use the download button to save this file or the print button to print it.
